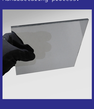
TWO WAY MIRROR *Domes*

WHAT IS A TWO WAY MIRROR

01

A two way mirror, also known as a one way mirror, is a semi-transparent mirror that is traditionally made for privacy and security purposes. It is made on a grey glass or acrylic substrate and the mirror coating is baked/sprayed on during the manufacturing process.



applications

- Schools
- Warehouses
- Retail Stores
- Offices

WHAT IS A TWO WAY MIRROR DOME?

A two way mirror dome allows you to hide a camera discreetly behind it. Install it on your ceiling prevent theft and other criminal activity. The dome mirror also provides a wide angle view of the reflection of customers and employees. It works by making the area dark where the camera is hiding. So the customers and employees can only see the mirror and not where the camera is pointing.
